

Batting Average

To calculate a batting average, divide the number of hits by the total number of at-bats, and then round the result to three decimal places. You can use a calculator for this, but it's also important to know how to write it correctly!

$$\begin{array}{r} \text{Average} \\ \text{At-Bats} \overline{) \text{ Hits}} \end{array}$$

$$\text{Hits} \div \text{At-Bats} = \text{Average}$$

$$\frac{\text{Hits}}{\text{At-Bats}} = \text{Average}$$

For Julio it would look like this:

$$\begin{array}{r} 0.333 \\ 9 \overline{) 3} \end{array}$$

$$3 \div 9 = 0.333$$

$$\frac{3}{9} = 0.333$$

Player Name	Hits	At-Bats	Batting Average
Julio	3	9	0.333
James	5	12	0.416
Grace	4	6	0.666
Tommy	1	5	0.200
Kaela	9	15	0.600
Frankie	3	7	0.428
